

FAMILY SCIENCE

FAMILY SCIENCE is a project of the Equals program at the Lawrence Hall of Science, University of California at Berkeley.

It is being offered in our school through a grant from the Summit Educational Foundation.

The program is presented for children in grade two and their parents or guardians. Since this is a family-oriented program, other children in the family may participate if they are currently attending classes in the Summit Public Elementary Schools. FAMILY SCIENCE will be offered for two sessions. Time and dates are listed elsewhere in this brochure. Participating families

must make a commitment to attend both sessions.

COURSE CONTENT

How old is the oldest tree? How many spines does a porcupine have? You will know the answers to these questions and many more after participating in FAMILY SCIENCE. During FAMILY SCIENCE, you will design structures, examine bubbles, and do many other exciting experiments. The emphasis of FAMILY SCIENCE is on hands-on, problem-solving approaches to science. FAMILY SCIENCE will provide a way for all of your family members to have fun while learning about the world around them.

If you are interested in participating in FAMILY SCIENCE,

please complete the Registration Form and return it to your child's teacher.
